

# NHS App

**The NHS App provides a simple and secure way to access a range of services including your online records using your smartphone or tablet.**

**You can register for the App without having to visit the practice with photographic ID.**

## **Once registered, you can:**

- Check your symptoms using the health A-Z from the NHS website
- Access advice on using NHS 111 online
- Book and manage your appointments with the practice
- Order repeat prescriptions
- Securely view your GP medical record (however, you will not be able to view documents through this version of the NHS App)
- Register to be an organ donor.

The NHS App ***does not replace existing online services*** – if you are already registered for GP online services this will continue in the usual way and will not be affected by using the NHS App.

**It is really important that the practice has your current mobile number or email address**

This enables us to send you a confirmation message once your online account has been successfully linked to the NHS App.

For more information on the NHS App visit: [www.nhs.uk/nhsapp](http://www.nhs.uk/nhsapp)
